

# Here's one way Parts Warehouse CAN HELP KEEP PATIENTS SAFE.

**The world is quickly changing** around us due to COVID-19. To continue to support you in your efforts to keep your clients safe, Parts Warehouse is working hard to provide the products and supplies you need.

In the early 1990's the ADA developed a guideline covering how far a water valve should safely retract. Many valves, like the Clippard WDV-2 will retract well over a foot. A problem occurs when the Foot Control is released with the HP in the patient's mouth; the water valve can retract saliva back through the handpiece and into the tubing. Only to be injected along with it's burden of virus and bacteria into the next patient's oral cavity – even though the HP has been sterilized and replaced.

Parts Warehouse factory sets our V-1805-LR "Low Retraction" WDV-2 to retract less than an inch, greatly reducing the possibility of drawing fluids through the handpiece and into the tubing. This decreases the chance for cross contamination. It also remains drip-free, unlike drippy non-retracting valves, and has the same great Clippard reliability you have come to enjoy.

**To help your clients visualize if they have a problem, we've developed a handy retraction tester that is small, easy to use, provides a graphic result of your clients retraction status in seconds, and is FREE to you!**

Here is your chance to discuss a greater level of safety with your clients, and to drop by their office before they re-open to test their units and potentially replace their valves. With the amount of time units have been idle, existing valves likely need to be replaced anyway. What an opportunity for you to make sure everything is ready to go, and to give your Doctors the tools they need to protect their clients!

## V-1805-LR

Limited retraction coolant water valve. \$40.00 retail

## Limited Retraction Water Valve

- Limited retraction for better cross contamination protection
- 10-32 ports
- Quick and easy replacement for existing water valve
- Includes free retraction tester

**Contact us** for as many FREE test kits as you would like. Show your doctors how you continue to watch out for them... on all levels.
